Happy Spring First Grade Families!

I hope you are enjoying the fresh air and outdoor beauty.

Thank you for picking up the student packets. I've been working on the next round. As I plan the lessons, I anticipate how the students will respond. My goal is to keep a routine, and to keep the lessons interesting.

Do let me know how the kiddos are doing. Let them know that I am proud of their efforts and hard work. I miss their enthusiasm and moments of discovery.

Dr. Seuss books and themes are a favorite part of the March lessons. I have included some Seuss activities. Because dental health is a part of our March science curriculum, I'd like for the students to read ***The Tooth Book*** by Dr. Seuss. You can access this read aloud by a Google search:

Dr. Seuss Read Aloud Book - You Tube

Enjoy the music lesson resources that Mrs. Hartman forwarded. I have been opening up the links while in the classroom. They are interesting and fun!

I have shared science links from ***You Tube Free School*** that the students would enjoy. They are about the solar system. The students have a lot of questions and interest in the topic.

The next scheduled curriculum packet pick-up is Monday, March 23rd.

I put a collection box on the Gr. 1 table in the hallway for work to be passed in. There are free materials for your benefit as well.

The 2nd packet is due on Monday, March 30th. The TCS office will be open until 6:00 pm weekdays for curriculum pick up and drop off. The TCS staff prays for your peace, safety, and well-being during this challenging change of events.

In His service, and yours,

AnnMarie Riendeau ariendeau@tcskeene.com
