

May 21, 2021

Hello Families,

We had a great time participating in the many Walkathon activities. The kids were so excited. They took turns and encouraged each other.

Thank you to families for all of the support!

Today we had our last spelling test. I complimented the students on their super effort this year with spelling practice.

Have the kids told you about their catapult experiments?

They each have a catapult machine for flinging a foil ball. It is up to each child to experiment by adjusting elastics and a spoon (lever) to fling the foil ball as far as possible. We've had some balls go 25 feet or more. I will send some photos of the students catapulting in the gym.

Today we did a magnet lab. Kids used magnets to test attraction and not. They are also very enthusiastic about their blank stapled scrap paper "books". The kids are writing stories and illustrating.

**Notes:** Feel free to send in reading logs and monthly Bible verse sheets any time. We are still collecting any books that have been borrowed. Thank you for the returns that have been received.

There is a long weekend coming up. Do enjoy - let's hope for more great weather.

God bless you!
