

February 26, 2022

Greetings First Grade Families,

I hope you are enjoying one more snow storm. The hints of spring have been nice, and soon to return.

Check out the first grade city. It is an example of the creativity and connections

that first graders make. Each child designed a factory store with advertising and displays. They even showed city transportation.

These kiddos delight in learning and

sharing their ideas. What a pleasure it is to enjoy God's world with them.

### Notes:

Thank you to families for the Valentine Party items. The children had a great time! Our 100<sup>th</sup> Day was a well-earned and fun break from their hard work this year.

On Monday, March 7th, the recycled robots are due. The students shared that they are enjoying creating a robot. I will put them on display for that week.

Tell the students that I miss them, and I will see them on Monday.

The optional mask update will be a welcome change at TCS.

Thank you for your support while we work on health guidelines.

Blessings of joy and peace,

*AnnMarie*
